Install SIM Card

1. With the back of the phone facing you, remove the battery cover, and place the first SIM card into the bottom SIM card slot with the gold-colored contacts facing upward.
2. If available, place the second SIM card into the top card slot with the gold-colored contacts facing down.

Install the first SIM card

Install the second SIM card

Install Battery

Align the gold-colored contacts of the battery with the battery compartment contacts. Slide the battery into the slot, gold-colored contact side first. When the contacts meet, press the battery into place. Slide and lock the back cover into place.

Power on/Power off

1. Press and hold the Home button for a few seconds to Power on.
2. Slide to unlock the screen; the phone will be in operating mode.
3. Press the Home button to lock the screen/ Press the Home button again to enter into Standby mode
4. Press and hold the Home button for a few seconds to turn off (Slide to Power off).
5. Press the Home button anytime to return to the Home Screen. Even while you're on a call, you can access your message, calendar or other applications.

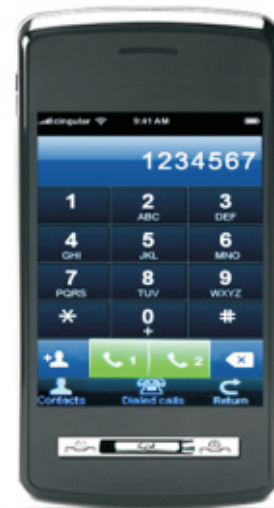

Volume Up/Down

Home button

Make a call

Tap the Dial button on the Home Screen, input the phone number and tap Call button to make a call manually. You may also make a call in Phone book or call history.

Write Message

Tap the SMS button on the Home Screen to write a text message. Or tap Text button, you will find more message options, text message, MMS, chat and voice Mail Service. SciPhone supports Handwriting Recognition with your finger or stylus.

JAVA

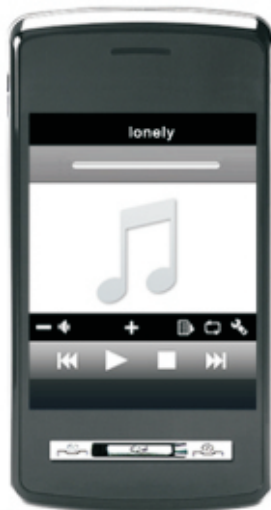

To date, the Java platform has attracted more than 5 million software developers. It's used in every major industry segment and has a presence in a wide range of devices, computers, and networks.

- 1.Download JAVA software from our website or other free websites
- 2.Copy JAVA software to any folder in the Memory Card of your SciPhone
- 3.Tap Documents button and find this JAVA software. Tap Option button to Install.
- 4.Tap the JAVA button on the Home Screen, and then you can run installed Java software.
- 5.Please note that not any JAVA software can run in your SciPhone.
